Former President of Delaware & Hudson Testified that Price of Coal Was Kept Down Out of Deference to Needs of the Public.

(By Associated Press.)

NEW YOUK, June 8.—The Interstate Commerce Commission to-day continued the investigation of the complaint of W. R. Hearst that the coal carrying railronds are violating the anti-polling section of the Sherman anti-trust law. Robert M. Oliphant, former president of the Delaware and Hudson, one of the respondent roads, corroborated the statements of the other coal men, who have testified that the price of coal to the public is to be raised ten cents a ton a month until a maximum increase of fifty cents a ton is reached. He was not propared to say that the increased cost of production would not exceed thirty cents. Mr. Oliphant said he doubted if his company made any money when coal was selling in New York at 44 or less. For the last ten years the profits of the company have been about seven per cent. It was out of deference to the needs of the public, the witness said, that the price of company coal was kept at \$5 just after the strike, when the independent operators were getting \$\$ to \$10.

Judge Campbell, the legal representative of the Reading system, declared his clients ready to concede that the price of coal is about \$5 a ton, and that the price will increase until \$5.50 is reached.

After a long argument between counsel the commission ruled in favor of Mr. Shearn's contention that the coal purchase contracts are admissible as evidence, Mr. Shearn then read from the record the contract between J. and J. J. Jermyn and the Susquehanna and Western Coal Company, made on November 1, 1909. By that contract the Jermyns agreed to sell their entire products to the Susquehanna and Western Coal Company, made on November 1, 1909. By that contract the Jermyns agreed to sell their entire products to the Susquehanna and Western Coal Company at prices ranging from fifty per cent, of the tidewater price realized by pea coal to sixty-ave per cent, realized for stove and chestuat coal.

A clause to the contract says if the price at iddewater shall be less than \$3.50 per lon for sizes greater than pea co

The lightning of Sunday morning did some damage, though nothing very serious. Three houses on Washington Street are said to have been struck. A portion of the weather boarding of the residence of Mrs. Nichols, No. 224 Washington Street, was ripped out a bit. Notwithstanding the fact that water was pouring wholesale out of the sky, the same bolt struck a pump in the back yard, burning it somewhat.

Another pump at the home of Mr. Alley, No. 230 on the same street, also got in in the way of the bolt. A water bucket was demolished and the pump itself was spilt. At the corner of Washington Street a store was struck, but was not much damaged.

HIS PREDICTION.

Somewhere in the West End yesterday there got abroad a report that a cloud-burst was due in Richmond at 3 o'clock in the afternoon. Some little excitement was occasioned by this startling assertion. It is known positively that certain ng two little girls, who, armed with imbrelias, sat with blanched faces awaiting the end.

The rainfall and the deca

umbrellas, sat with blanched faces awaiting the end.

The rainfall and the flood verify the dire prediction of one J. W. Jefferson, who roundly asserted a few days back that these things would come yesterday. The prophet, encouraged, ventures a further prediction. He issued the following manifesto yesterday.

To the people of Richmond:

J. W. Jefferson recently predicted day is near at hand. On to-morrow you will all see, as he has said, what our above God will do for the city. On the 12th and 13th you can look for a hot wave to come marching in the city. On the 17th and 18th will be the hottest days that have been in this year.

Prophet J. W. JEFFERSON.

The rainfall throughout this section has been unusually heavy in the past few days. The rain began falling Friday, continued through Saturday, and was followed early Sunday morning by a series of thunderstorms of considerable violence, the rainfall resembling a cloud-burst. Another storm came up last evening, and yet another at midnight. This afternoon showers fell alternately, and it is yet cloudy and unsettled.

The Rivanna River, which runs northeast of the city, began to overflow its banks early Saturday night, and continued to rise until noon yesterday. Much damage was done to the wheat and oats on the lowlands, and gardens were, in many cases, entirely washed out. At the Charlottesville Woollen Mills, where Moore's Creek empiles into the Rivanna, the water rose a distance of lifteen feet. The basement of the mill was completely submerged, and water entered the weaving rooms on the second floor. The male employes were called out at midnight and worked in water waist deep to remove what they could. As day approached and the rain continued to fall, they went to work to remove the cloth from the second floor to a place of safety. This was finally accomplished, but not before some loss had been sustained.

# Is Not a Skin Disease. Most people have an idea that rheumatism is contracted like a cold, that the damp, chilly air penetrates the muscles and joints and causes the terrible aches and pains, or that it is something like a skin disease to be rubbed away with liniment or drawn out with plasters; but Rhuematism originates in the blood and is caused by Urea, or Uric Acid, an irritating, corroding poison that settles in muscles, joints and nerves, producing inflammation and soreness and the sharp, cutting pains peculiar to this distressing disease. Exposure to bad weather or sudden chilling of the body will hasten an attack of Rheumatism after the blood and system are in the right condition for it to develop, but have nothing to do with the real true causes of Rheumatism, which are internal and not external. Liniments, plasters and rubbing will sometimes reduce the inflammation and swelling and ease the pain for a time, but fail to relieve permanently because they do not reach the seat of the trouble. S. S. S. cures Rheumatism because it attacks it in the blood, and the Uric Acid poison is neutralized, the sluggish circulation stimulated and quickened, and soon the system is parified and cleansed, the aching muscles and joints are relieved of all irritating matter and a lasting cure of this most painful disease effected. S. S. S. is a harmless vegetable remedy, unequalted as a blood purifier and an invigorating, pleasant tonic. Book on Rheumatism will be mailed free. THE SWIFT SPECIFIC CO., ATLANTA, GA.
